

The Glade was designed *with* our community *for* our community, and soon we'll enjoy its many features and amenities. We'll also be able to take in the incredible transformation of eastern Forest Park from a brand-new perspective.

The original Steinberg facility's roof was meant to double as an observation deck, but it lacked an inviting or accessible way for visitors to trek to the top. The stairs were difficult to access, and tall walls blocked much of the view. Once the Glade opens, however, visitors will have access to unobstructed sightlines of the Park's east end from an all-new second story.

Imagine the Glade

*An all-season vision for Steinberg
and eastern Forest Park*

Imagine the Glade

Forest Park's transition from disrepair in the 1980s to the vibrant destination of today illustrates what's possible when we work together toward a shared vision. In partnership with the City of St. Louis, Forest Park Forever has restored historic landmarks, including Emerson Grand Basin, Art Hill, the Boathouse, the World's Fair Pavilion and the Jewel Box. We've also created new spaces like the Anne O'C. Albrecht Nature Playscape and the Nicholas J. Booker Basketball Courts. The Glade will be the next must-see destination in Forest Park.

Five years ago, the innovative Nature Playscape opened to the delight of Park explorers of all ages.

Two years ago, the first-ever basketball courts in Forest Park opened, bringing new activity to the Park's northern entrance.

Imagine a New Second-Story Experience in Forest Park

Steinberg’s new upper floor creates stunning views and enables indoor and outdoor gathering and dining opportunities unlike anything else in Forest Park.

Introducing the Taylor Family Terrace

On the Taylor Family Terrace, visitors can enjoy a meal *al fresco* in warmer weather, soaking up the sun or relaxing under an extensive shade structure. In cooler weather, innovative and flexible seating can be converted from tabletops to fire pits.

The rink below, the community lawn nearby and the natural areas in the distance will create a beautiful backdrop for this elevated Forest Park experience.

Introducing Amelia’s Place

Indoor areas on the second floor are made for casual activities, including game nights, group meetups and gatherings with family and friends. The Amelia Ellen Broughton Community Living Room (“Amelia’s Place”) will be a spot like no other in Forest Park. As its name suggests, it’s designed to be comfortable and inviting with a welcoming living room feel.

This flexible space will be open for daily community use but can host special events, too. Visitors will gather at Amelia’s Place to relax, get work done, keep warm in winter, cool off in the summer and enjoy a comfortable space with a one-of-a-kind perspective of the Park.

Jack Taylor’s substantial early gifts were foundational to Forest Park’s restoration, and his family has generously supported the Park and the entire St. Louis region for decades. Now, their leadership support for the Imagine the Glade campaign is helping build this community-inspired place.

“Andy and I are thrilled to see this exciting vision come to life in Forest Park. This beautiful new destination will bring people together with welcoming family-friendly spaces that can be enjoyed year-round,” says Barbara Taylor, Executive Committee member of the Forest Park Forever Board of Directors. “We are especially proud of the care taken to preserve the historic character of Steinberg. Every stone on the façade was carefully removed, numbered, cleaned and returned to its original place. The result is spectacular. This remarkable restoration honors the past while creating a vibrant future for generations to enjoy.”

“This remarkable restoration honors the past while creating a vibrant future for generations to enjoy.”

Construction Progress

Construction has entered the finishing phase, and the changes to the east side of Forest Park are striking to see. Recent progress provides a clear outline of the new rink, with concrete flatwork poured around the perimeter and tall light poles and luminaires installed overhead.

The pedestrian bridges across the Taylor Kindle River are complete and finished with stone veneer and coping. Machinery for the new state-of-the-art ice plant has been delivered and installed, along with water heaters and filtration systems. Other interior work includes drywall, HVAC, plumbing and tile work in the kitchen, restrooms and event rooms.

Keep up with construction updates at forestparkforever.org/glade-construction.
